UC Davis Weill
School of Veterinary Medicine

We are Hiring

Assistant/Associate/Full Professor of Teaching in Epidemiology

Department of Medicine and Epidemiology

Department of Population Health and Reproduction

Position Overview: The Weill School of Veterinary Medicine (WSVM) at UC Davis seeks an interdisciplinary Assistant/Associate/Full Professor of Teaching in Epidemiology to advance its veterinary education and research mission through pedagogy of epidemiology in veterinary sciences. Professor of Teaching faculty are Academic Senate faculty members whose expertise and responsibilities center on instruction and scholarly activities in their field or involving pedagogy.

Qualifications: An advanced graduate degree (PhD required) in epidemiology or related field, with experience in teaching as an instructor, is required. Must have expertise in quantitative epidemiological methods and biostatistics. Must demonstrate successful application of epidemiology in collaborative settings involving topics such as disease surveillance, disease ecology, causal inference, risk factor analyses, clinical algorithm development, population health study designs, intervention evaluation, etc. Competence in an appropriate programming language (e.g. SAS, R, Stata) is required. A documented scholarly record or potential to develop innovative scholarly activities in veterinary epidemiology and/or pedagogy is required. Demonstrated excellence in teaching is required, as is evidence of engaging students with gaps in traditional mathematics training. Evidence of leadership skills is required. The individual must possess excellent interpersonal and communication skills, and a demonstrated ability to work with others in a collegial atmosphere. A veterinary medical degree (DVM or equivalent) is preferred. Research experience in animal and/or vector epidemiology, and ability to teach advanced epidemiologic methodology (e.g., causal inference, counterfactual theory, methods for assessing heterogeneity of effects or sources of bias), are preferred. Documented success in the following areas: teaching large classes of 150 or more students, use of evidence-based teaching practices, use of modern instructional technologies, and the ability to identify and develop effective teaching strategies for varied levels of learner expertise in epidemiology.

Salary Range: $190,800 - $352,100. Other components of pay may be offered when necessary to meet competitive conditions, qualifications, and experience.
